

THE DOUBLE 'WOW' FACTOR

Cerise™ Nutraceuticals is a line of products that combines the therapeutic benefits of 100% natural cherry concentrates and patented, ultra-refined emu/kalaya oil**. The result is a family of all-natural products rich in antioxidants and Omega 3, 6 and 9 fatty acids.

The synergistic effects of this patented formulation can be found in our unique line of therapeutic Facial Skin Solution™, Facial Skin Cream™, Hand & Body Lotion™, Joint & Muscle Comfort™ serum, Head & Body Comfort™ serum, and in our Total Body Rhythm™ Capsules.

But don't confuse our products with other, less expensive brands! Cerise™ products use only ultra-refined, unsaturated kalaya oil, 100% natural tart cherry concentrate, and mercury-free North Sea fish oil for a totally natural experience.

THE WONDER OF KALAYA OIL

The soothing, non-greasy properties of Cerise™ lotions can be attributed to our use of ultra-refined, unsaturated kalaya oil. Touted as "The wonder oil from Down Under™," emu oil has been used by Australian Aborigines for centuries. A 100% natural carrier, kalaya oil permeates the skin, bringing with it the full benefits of our cherry concentrate. In fact, research has shown that nutrients reach cells 100-times faster and more efficiently when combined with kalaya oil.**

So why isn't this lotion oily? Because emu oil is so close in property to our own natural body oils, it absorbs into the skin instantly – penetrating dry, irritated skin and quickly delivering the natural antioxidants of 100% tart cherries and the essential Omega 3, 6 and 9 fatty acids found in kalaya oil. Skin is left soft and conditioned, but never greasy.

And because of the greaseless properties of our skin care lotions and creams, you can quickly return to handling paper, electronics or clothing without worrying about leaving an oily residue!

The concentrated nature of Cerise™ products also means that you need to use only a small amount to get your skin back into its 'comfort level.'

****Because emu/kalaya oil is a transdermal carrier, we recommend using Cerise™ creams and lotions only on clean, recently washed skin.**
